

## **Resilience: new intervention perspectives on rehabilitation** **April 27-28, 2011**

### **Participant profiles**

Professionals and administrators from the healthcare and education sectors, researchers and students, professionals and representatives from various associations who work with users of healthcare services and their loved ones.

### **Objectives**

- 1) To highlight the practical aspect of the concept of resilience in healthcare;
- 2) To present practical and concrete applications of the concept in healthcare interventions;
- 3) To suggest approaches, methods, and techniques to integrate the concept of resilience in healthcare interventions;
- 4) To develop relationships on the provincial, national, and international levels between researchers, areas of practice, and users of healthcare services in order to develop research projects and interventions that integrate the concept of resilience in healthcare.

### **Scientific organizing committee**

*Hélène Lefebvre Ph.D.*, Full professor, in charge for International and Interdisciplinarity, Faculty of Nursing, Université de Montréal; Co-director of the *Groupe interdisciplinaire de recherche sur l'adaptation de la famille et son environnement* (GIRAFE-CRIR)
